

# Importance of EI in an AI World

MX Melbourne

# The Complete 'y' of EI

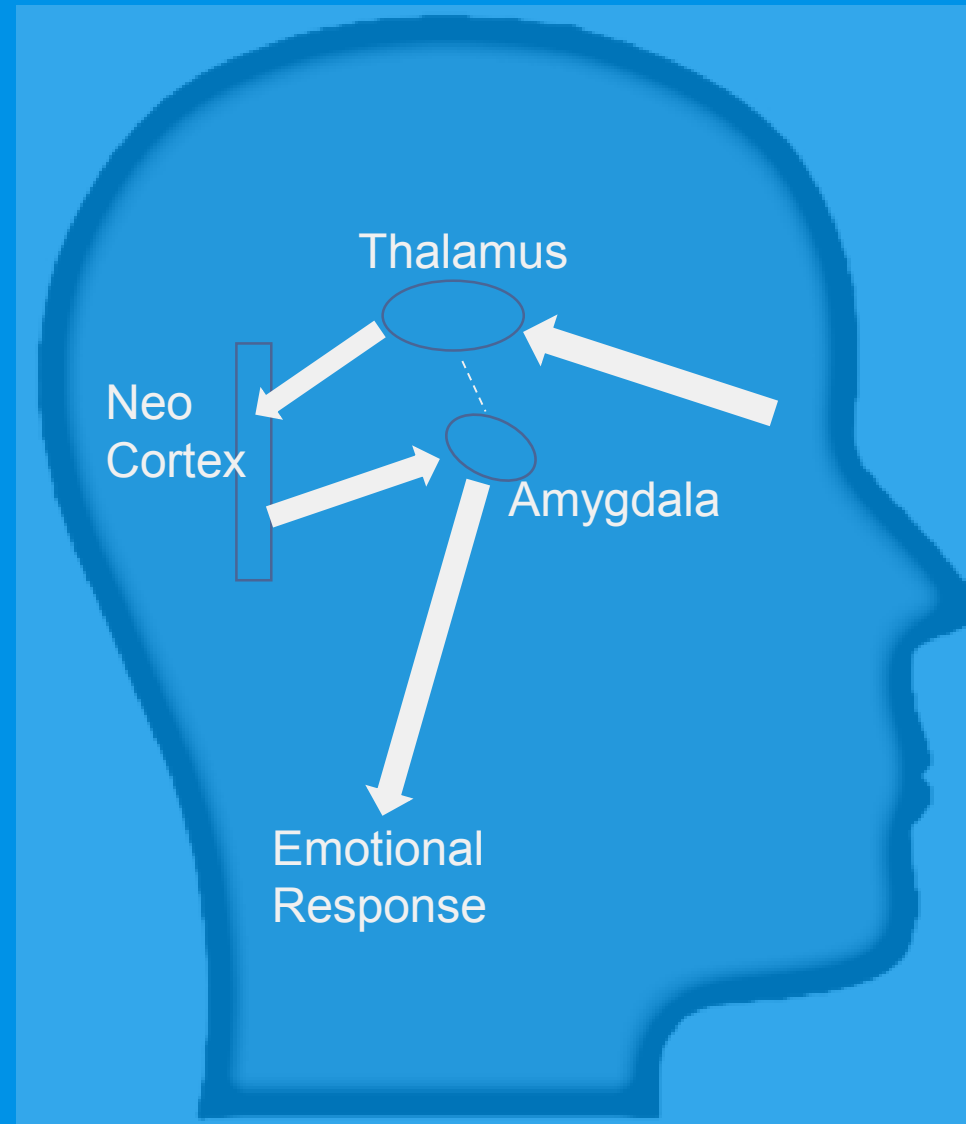

Human decision are made  
based on emotional drivers.

# The Emotional Brain

Thalamus:  
Converts into brain language

Visual Cortex:  
Processes visual information and assesses what type of response is required. Signal sent to Amygdala for emotional response.

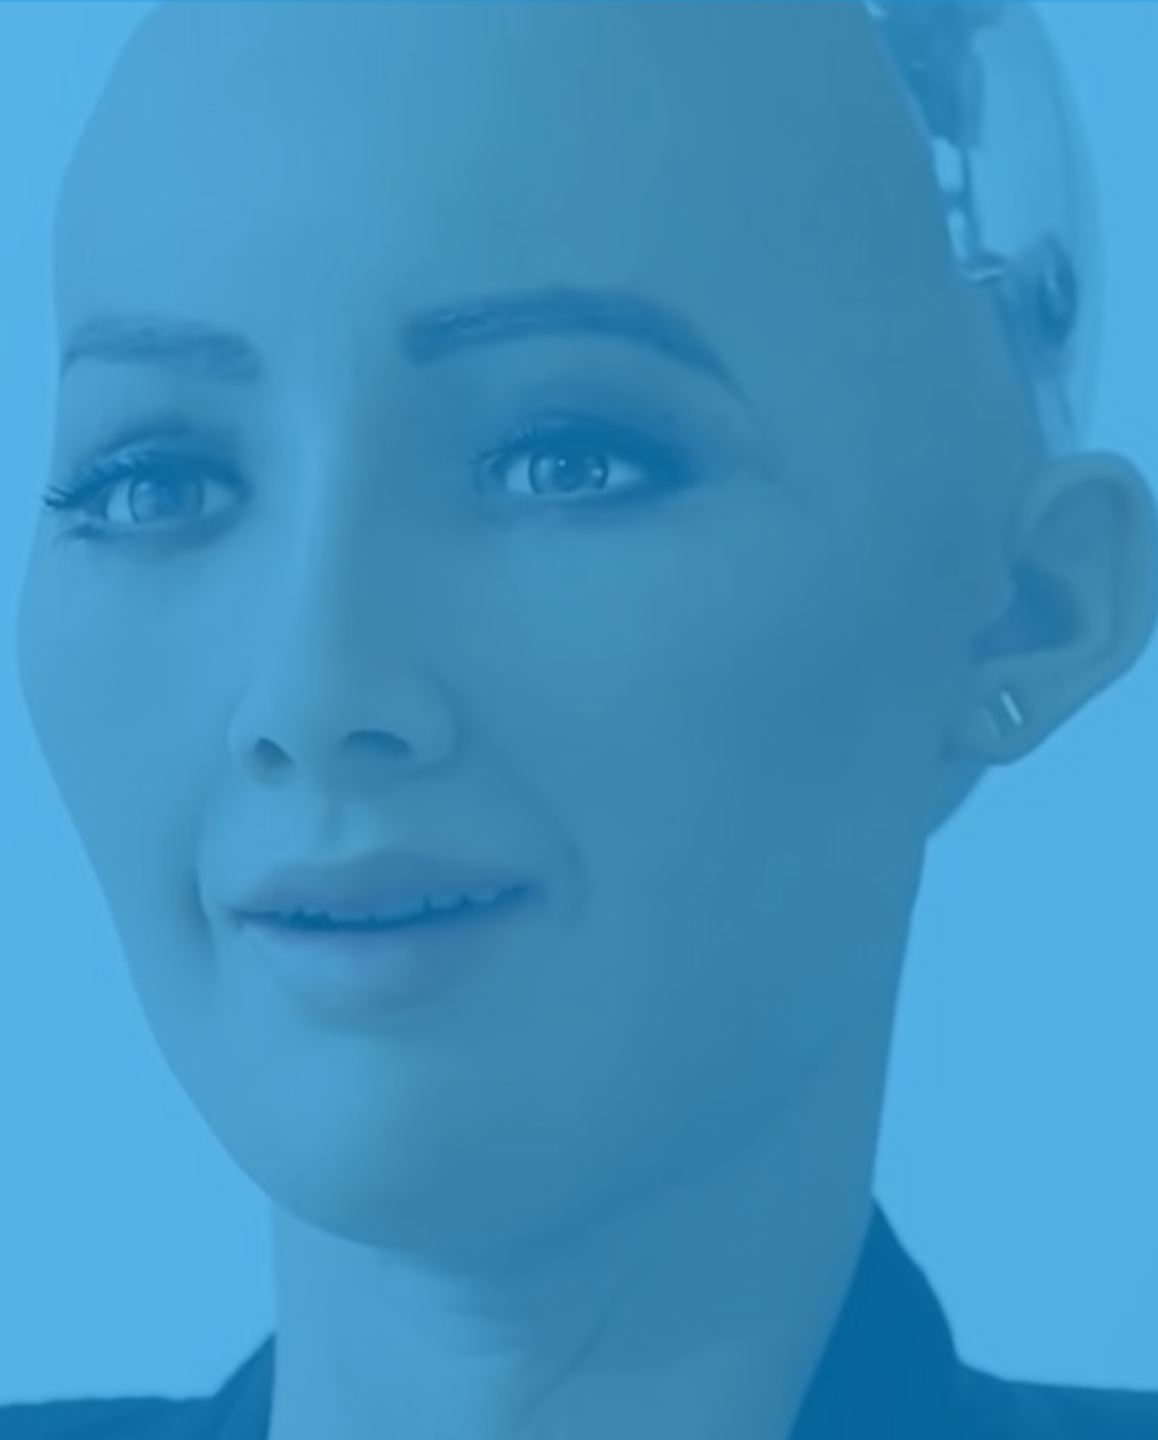

Amygdala:  
Triggers the  
Emotional  
Response

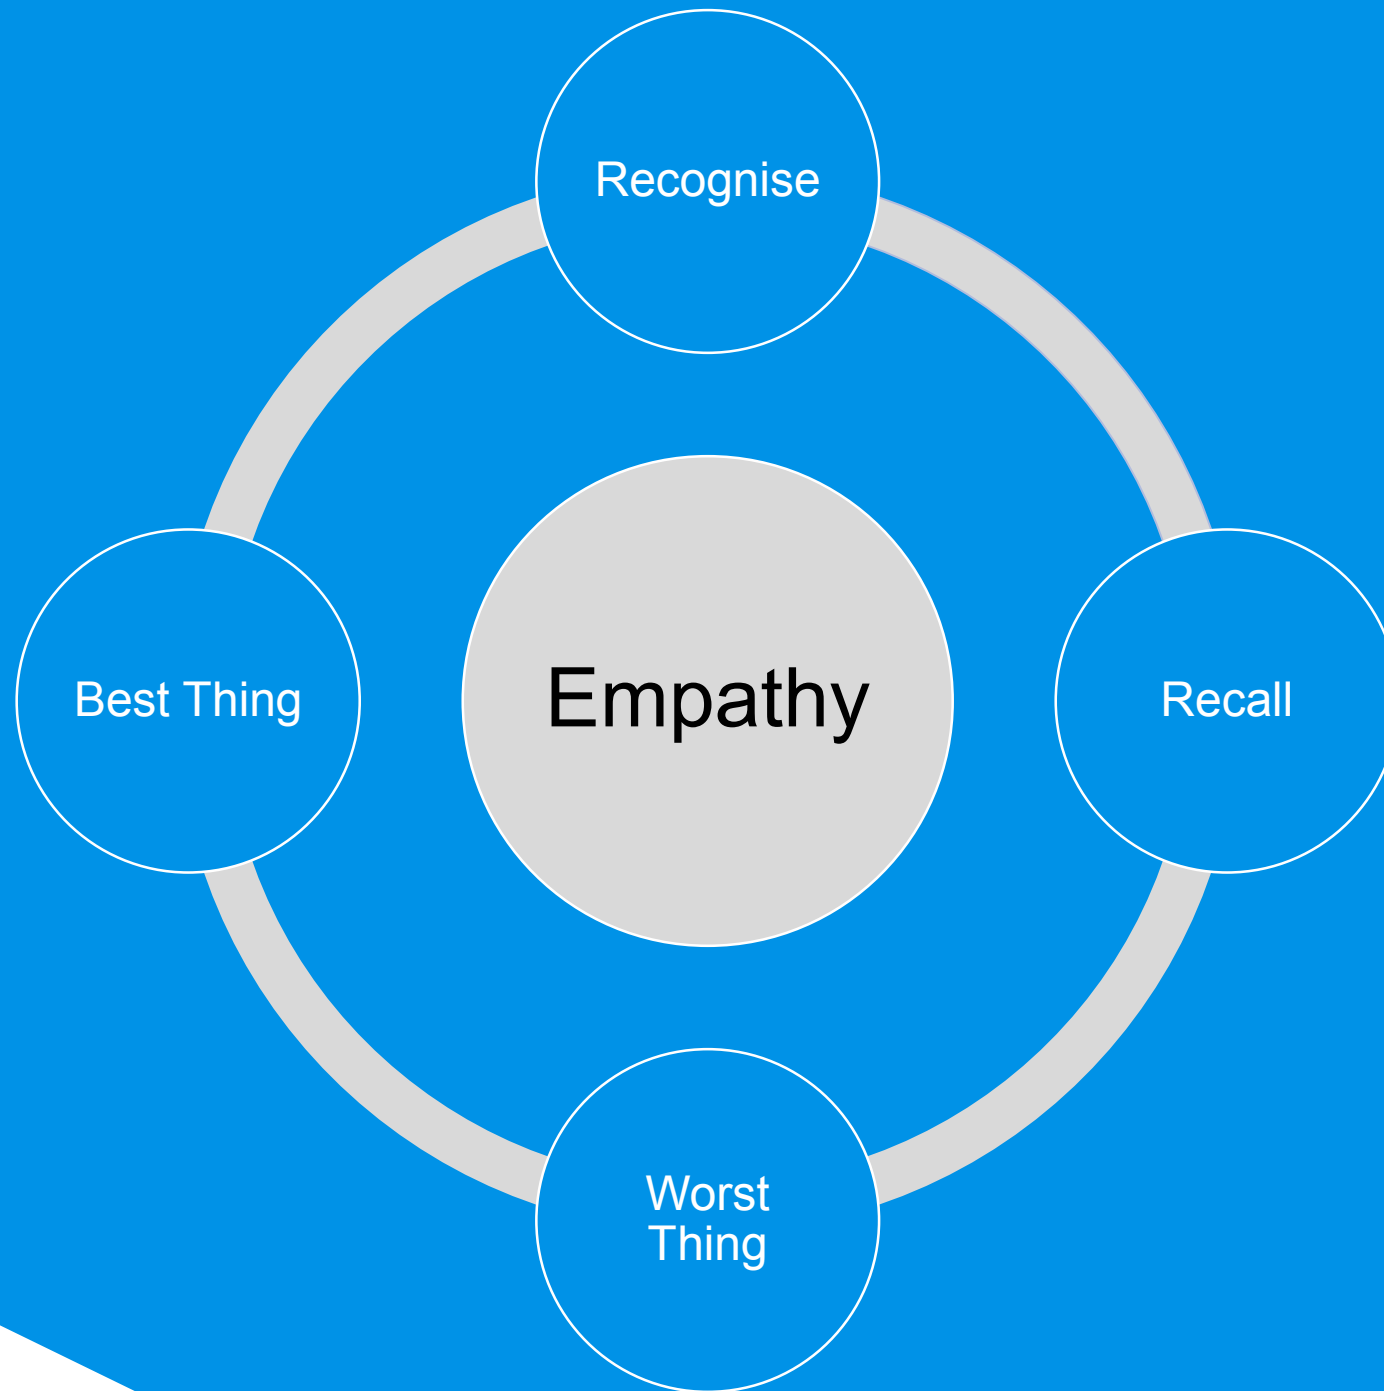

Emotional  
Response:  
Blood  
pressure,  
muscles  
etc.

The EI element within technology  
is programmed by humans.

# AI's with EI

When technology doesn't work,  
I want human help.

# Key Takeaways

1. The purpose and emotional outcome is more important than the process.
2. EI belongs in AI, but it can only be as good as the programmer.
3. Humans will always be needed and Empathy will always be key.

The future is more than just  
technology, it's the marriage of  
**AI & EI**

# Emotional Intelligence

## Finding Your 'y'

- ✓ EI Seminars
- ✓ Group Training EI Programs
- ✓ Tailored EI Workshops & Corporate Consulting
- ✓ Keynote Speaking
